

The FreedomAD SIE (speaker-in-the-ear) is an open fit style instrument that sits behind the ear. This ultra small, light-weight, comfortable design is practically invisible with minimal occlusion and features industry leading ADRO® processing. Utilizes a size 10 battery. The SIE can be configured for high frequency or wide range hearing losses.

ADRO Processor: ADRO is the world's first wide dynamic range optimizer. Using the power of DSP, ADRO carries out sophisticated analysis and implements fuzzy logic rules to continuously optimize the output of the hearing aid. This provides comfort as well as improved speech perception in all listening environments.

Advanced Features: Adaptive Feedback Canceller with Fast Acting Suppression, Multiple-Channel Noise Suppression, Adaptive Directional Microphone, and patented Ultra Low Digital Delay.

Memories/Channels: Four independently programmable memories with 32 channels.

Adaptive Directional Microphone: Standard option

Complete with Freedom Package:

America Hears Virtual Office software with our exclusive on-line and do-it-yourself adjustment features

Freedom programmer

Programming cables

USB cable

20 hearing aid batteries per instrument

Memory selector wand - also a battery insertion & removal tool

Hearing instrument rechargeable drying kit

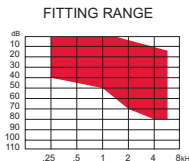

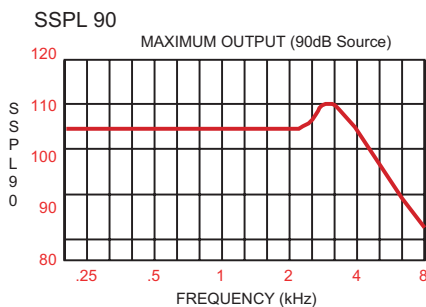

Battery tester & holder

Hearing aid cleaning tools

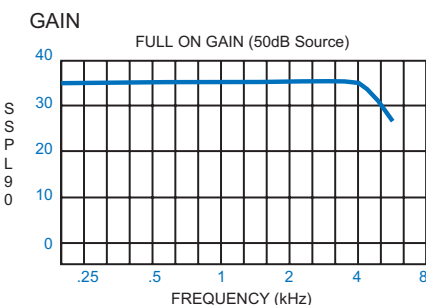

Plush hard case & soft pouch for instrument storage

12 month repair warranty

ANSI Test Data

SPECIFICATION		
MAX SSPL 90	110 dB	± 4
HFA SSPL 90	106 dB	± 4
MAX FOG	35 dB	± 3
HFA FOG	35 dB	± 3
THD 500 Hz	≤ 2%	MAX
800 Hz	≤ 2%	MAX
1.6 KHz	≤ 2%	MAX
EIN	≤ 27dB	MAX
BATT. DRAIN	1.1 mA	MAX
